

SERVICES & PRICING GUIDE

# *Business Operations.*

---

Intentional infrastructure for businesses built to last.

[theintentionaltea.com](https://theintentionaltea.com)

# 01

## Your business deserves infrastructure that holds.

Hi, my name is Tiara Stewart, and I spent six years in the corporate world working at the intersection of operations, sales enablement, and instructional design — building the systems that kept other people's companies running. Then I left, built my own digital business from scratch, and figured out pretty quickly what the difference is between a business that looks operational and one that actually is.

I build high-converting websites and the backend systems required to run them. Most web designers hand you a beautiful site with no plan for what happens when leads actually come in. Most operations people can't design their way out of a template. I do both, so the thing I build for you works from the front end all the way through to fulfillment.

The businesses that reach out to me already have the thing: a real service, real customers, real years of experience. What's missing is the structure around it. Consistent pricing, a web presence that doesn't embarrass them, a booking system that doesn't require a personal text to every client, documentation that keeps the whole thing running without the owner as the connective tissue for everything.

I come in, do the research, build the infrastructure, and hand you something that actually runs. You keep doing what you're good at. The backend handles itself.

### IN THIS GUIDE

- |    |                    |                                                  |    |                 |                                          |
|----|--------------------|--------------------------------------------------|----|-----------------|------------------------------------------|
| 01 | Hello & Welcome    | Who I am and why the work is shaped this way     | 02 | Who This Is For | And, just as usefully, who it is not for |
| 03 | Services & Pricing | Three ways to work together, and what each costs | 04 | How It Works    | From booking to handoff, step by step    |
| 05 | The Methodology    | The five phases every build runs through         | 06 | What It's Worth | The same scope, priced piece by piece    |
| 07 | Before You Book    | Revisions, timelines, payment, ownership         | 08 | Questions       | The ones that come up every time         |

# 02

## Your business is running. But you're the one holding it together.

This is for established businesses with a real product and real customers — not businesses still finding their footing. The operational chaos comes from not having professional infrastructure, not from lacking a viable offer.

- Customers reach out but your booking process is chaos — texts, DMs, verbal confirmations, none of it connected
- Your pricing is inconsistent, or you've been quoting from memory and you're not sure your numbers are right anymore
- You have no website, or the one you have doesn't reflect where you actually are or what you actually charge
- You're doing manually what should be automated — confirmations, reminders, follow-ups, payment collection
- You've been meaning to "get organized" for a while, but the day-to-day keeps coming and it never happens
- Someone handed you a referral and you want to look and function like the business the referral implied you were

### THIS IS NOT FOR

*Businesses just starting out that need help finding their product or audience. This is for businesses that already have the product, the customers, and the track record — and need someone to build the professional infrastructure around what's already working.*

# 03

## Three ways to work together.

*Every price below is the whole price. Nothing is quoted per hour, and nothing is added after the scope is signed.*

### START HERE

\$350

#### Business Clarity Call

90 MINUTES · REPORT WITHIN 5  
BUSINESS DAYS

A working session where we look at your business together, followed by a written report on your existing systems and a prioritised plan for what to change first.

- Pre-call intake form
- 90-minute working session
- Written report on your systems, tools, website, booking and CRM
- Prioritised action plan with tool recommendations
- 7-day follow-up window for questions
- The full \$350 is credited toward a Build booked within 90 days

### MOST CHOSEN

FROM \$1,500

#### Custom Operations & Systems Hub

SCALES WITH SCOPE, TO A CEILING OF  
\$4,500 · PAID HALF TO BEGIN, HALF AT  
HANDOFF

One place where the business actually lives. Built in your own Notion workspace, handed over as yours, with the walkthrough and documentation to keep it running.

- Up to three modules from the library
- One planning call
- Branding applied throughout
- One existing list migrated in
- Walkthrough session and handoff document
- 30-day check-in
- Beyond three modules, \$250 each; extra lists \$150; outside-tool connections \$300

## MOST COMPLETE

FROM \$5,000

## Full Business Build

SCALES WITH SCOPE, TO A CEILING OF \$12,000 · PAID IN THIRDS

The whole thing. Brand, hub, portal and handoff, built as one engagement with one point of contact and one methodology from start to finish.

- The Clarity Call and its report, included
- Four brand sessions and the brand document
- The hub, scoped as above
- The client portal
- Full handoff and 30-day check-in
- Website add-on \$3,000 for up to five pages; \$400 per extra page; \$1,200 for shop or booking integration

## AFTERWARDS

\$250

## Hub Check-in

ONE-OFF · 60 MINUTES · SCREEN-SHARE

A one-off, 60-minute screen-share to review and adjust after handoff. Book it whenever you need it. There is no retainer, no subscription, and no standing access to your systems after the project closes.

*The Clarity Call fee comes off a Build booked within ninety days. Starting small costs you nothing if you go further.*

# 04

## From booking to handoff.

*Five steps, and the first one is real work rather than a sales call.*

### 1 Book the Clarity Call

The Clarity Call is the front door. \$350, paid at booking, and the full amount comes off a Build booked within 90 days. There is no free discovery call — the first conversation is the work, not a sales pitch.

### 2 Intake form

After payment you get a detailed intake form. Complete it before the session — the clock does not start until it comes back.

### 3 The session, then the report

Ninety minutes together on your business, then a written report within five business days with a prioritised plan. Whether you go further is up to you.

### 4 Scope and agreement

If you continue, the scope gets locked in writing as Exhibit A of the service agreement, and the schedule opens once the first payment lands.

### 5 Build, review, handoff

One round of consolidated revisions per phase. Then the handoff document, the walkthrough, and a 30-day check-in. Final payment is due before files and credentials transfer.

# 05

## Five phases. One complete build.

*The depth scales with scope. The method does not change.*

### 1 Discovery

An independent audit of everything that already exists — Google Drive, existing forms, social accounts, whatever you have. I review it before asking questions, so when we talk, we're not starting from zero.

### 2 Research & Analysis

Four to six direct competitors researched. Pricing history reconstructed. Market rates mapped. Tool audit completed. You would never spend eight hours doing this. I do it once, document it cleanly, and hand you conclusions that would have taken months to arrive at.

### 3 Planning & Scope

Your signature deliverable. A complete professional document covering competitive landscape, unified pricing recommendation, add-on and upsell strategy, operations framework, website plan, and tech stack. It's yours whether you continue or not — though most clients do.

### 4 Build

Website, booking system, automations, intake forms, the hub, and all supporting documents. Every item in the scope gets built.

### 5 Handoff & Training

Complete handoff document. Recorded walkthrough call. How-to guides for the tools you'll use most. 30-day check-in to make sure everything is running correctly.

# 06

## The same scope, piece by piece.

*Market rates for what the Full Build includes, hired separately. The comparison is deliberately conservative.*

| DELIVERABLE                          | MARKET RATE             | HERE                           |
|--------------------------------------|-------------------------|--------------------------------|
| Custom website (5 pages, responsive) | \$2,500–\$5,000         | Included                       |
| Competitor research & analysis       | \$800–\$1,500           | Included                       |
| Pricing strategy & documentation     | \$500–\$1,000           | Included                       |
| Booking system setup & automation    | \$400–\$800             | Included                       |
| Client portal & intake build         | \$300–\$600             | Included                       |
| Automated email sequences            | \$400–\$800             | Included                       |
| Brand sessions & brand document      | \$800–\$1,500           | Included                       |
| Walkthrough + handoff documentation  | \$300–\$500             | Included                       |
| <b>Total if bought separately</b>    | <b>\$6,000–\$11,700</b> | <b>Full Build from \$5,000</b> |

### WHAT MAKES THIS DIFFERENT

*Hiring separately means coordinating five different people, managing timelines across all of them, and hoping the final product holds together. This is one engagement, one point of contact, one methodology from start to finish.*

## 07

## A few things worth knowing.

*Said plainly here so none of it is a surprise later.*

### ONE REVISION ROUND PER PHASE.

If something isn't right after review, we fix it — once, with consolidated feedback. Additional rounds are billed at \$100 per hour, agreed in writing first.

### THE TIMELINE DEPENDS ON YOU TOO.

The clock starts the day your first payment is received and your intake is returned. Delays in providing access or information extend the timeline accordingly.

### ALL PAYMENTS ARE FINAL.

Deposits, milestone payments, balances and paid calls are non-refundable. Booking takes a place out of the schedule that cannot be resold, and work starts before you next hear from me.

**FINAL PAYMENT BEFORE FINAL TRANSFER.**

The balance is due at handoff, before files and credentials transfer. You get the invoice one week before the handoff call.

**EVERYTHING YOU PAID FOR IS YOURS.**

All deliverables — website, documents, templates, systems — transfer to you in full on receipt of final payment.

**SUPPORT AFTERWARDS IS A SINGLE SESSION, NOT A SUBSCRIPTION.**

A \$250 Hub Check-in, booked whenever you want one. No retainer, no re-onboarding fee, no standing access to your systems.

# 08

## Questions you probably have.

### WHAT'S INCLUDED IN THE BUSINESS CLARITY CALL?

A pre-call intake form, a 90-minute working session where we look at your business together, followed by a written report on your existing systems — website, CRM, booking, email, tools — and a prioritised action plan with recommendations. Delivered within 5 business days. You also get a 7-day follow-up window for questions once you've had time to read it. If you book a Build within 90 days, the full \$350 comes off the price.

### DO I NEED A CERTAIN SIZE OF BUSINESS OR REVENUE LEVEL?

No. What matters is that you have a real product or service and real customers — not a particular revenue threshold.

### WHAT IF I'M NOT SURE WHICH ENGAGEMENT IS RIGHT FOR ME?

Book the Clarity Call. That is what it is for. By the end of the session you will know which option makes sense, and the fee comes off a Build if you go ahead.

**DO YOU DO FREE DISCOVERY CALLS BEFORE I PAY?**

No. The Clarity Call replaced it. A free intro call is a sales conversation; the Clarity Call is the work, and you leave with a written plan whether or not you continue.

**WHAT IF THE BUSINESS OWNER ISN'T COMFORTABLE WITH NEW TOOLS?**

That's exactly who I build for. The tools I implement are ones your team can actually use. The handoff documentation and walkthrough call are designed for non-technical owners.

**WHAT INDUSTRIES DO YOU WORK WITH?**

Small service businesses where the owner delivers the service directly and the chaos comes from not having professional infrastructure. Event services, personal services, food and beverage, health and wellness, creative services, trades.

**CAN I ADD SUPPORT AFTER THE PROJECT IS DONE?**

Yes. A \$250 Hub Check-in, booked whenever you need one. There is no retainer, no minimum, and no fee for coming back later.

*Your business has the product.  
Let's build the infrastructure.*

Book the Clarity Call and we start with the work, not a sales conversation.
